

# Booster Warranty

Your story matters

# What it covers?

Booster Warranty is cover for mechanical and electrical failure and acts as shortfall cover for Pre-Owned Warranty.

The policy will cover additional or increased limits of components covered on existing / underlying warranty.

# Types of cover

There are two types of Boosters covers:  
**Standard and Executive**

# Cover period

Cover commences on your policy purchase date or the effective date represented on your existing/underlying warranty. Your Policy will be valid for a 24 (twenty four) month period. Should the existing/underlying warranty expire, cover under your policy will continue and operate as a standalone policy for the remaining period of cover stipulated on your welcome letter schedule. The administrator will request a copy of the expired existing/underlying warranty from the underlying insurer when a claim is submitted under your Policy. The limits provided for on the expired existing/underlying warranty will be deemed as a first amount payable by you for all claims logged with the administrator on your policy.

# Eligible Vehicles

Your vehicle needs to be covered by an existing/underlying warranty for you to be eligible for this Booster Warranty. Cover under this Policy is restricted to those components listed in your existing/underlying warranty. The maximum limits provided for those components are listed under the Standard or Executive option chosen by you.

# Components covered:

Components Covered must align to your existing/underlying warranty.

Additional Component Cover covers components not covered in the underlying warranty, up to a certain limit.

- Battery jump-start
- Towing services
- Car lockout services
- Emergency fuel delivery
- Message relay service
- Direction service.

# Pricing

Options	Pricing 24 months
Standard	R3,538.38
